Project Description

JSE performed inspection on both eastbound and westbound US 52 Bridges. The eastbound bridge is a 983-foot long, nine-span, steel Deck Truss that was built in 1936. The westbound bridge is a 1003-foot long, nine-span, steel girder bridge that was built in 1969. JSE created rehabilitation plans that include the following:

- Deck repairs, new expansion joints, and deck drain replacement
- Retrofits to connections
- New approach slabs and approach railing
